

MUHAMMAD SAMEER ALI CV.

03151265238 ◇ House no: 329, Sector 12/D, Orangi Town Karachi,

sameeralidev678@gmail.com ◇ [Sameer Portfolio](#) ◇

OBJECTIVE :

As a passionate Front-End Web Developer, I strive to create seamless, high-performance, and visually appealing digital experiences. My goal is to combine clean, efficient code with modern design principles to build responsive and user-focused websites. With a strong eye for detail and a commitment to continuous learning, I aim to contribute innovative ideas, optimize performance, and deliver projects that leave a lasting impression on users and clients alike.

EDUCATION :

Matric in Science , Matchless public secondary School , A+ grade	2024 Complete
Intermediate Computer Science Student , DJ Science Government College	2025 Continue
English Language , House of English (The No 1 Institute of Orangi Town Karachi) , Excellent	2025 Continue

TECHNICAL LANGUAGES:

Language :	HTML, CSS, TAILWIND CSS , BOOTSTRAP, JAVASCRIPT, TYPESCRIPT, etc.
Extra :	Git, Github, Formik, , Redux, shadcn, React Router, etc.
Frame Work :	REACT.JS, NEXT.JS etc.

PROJECTS AND LEARNING EXPERIENCE :

Sansa: The **Sansa Shopping App** project pushed me to bridge design with functionality. I crafted user-friendly interfaces that make shopping seamless while integrating backend systems that keep everything running smoothly. I focused on performance optimization, clean code, and reliable data management so users enjoy fast, intuitive experience. ([Try it here](#))

Haiger Engineer: Haiger Engineering is a project that highlights my practical understanding of electrical systems and technical precision. I focused on creating efficient, reliable, and performance-driven solutions that reflect real-world engineering standards. ([Try it here](#))

Truck Services: Truck Services is a front-end project showcasing transport and logistics services in a clean, modern, and user-friendly way. I focused on responsive layouts, smooth navigation, and a professional design that's both functional and visually appealing. ([Try it here](#))

Dapixel: Dapixel is a modern and responsive digital agency website built with HTML and Tailwind CSS , It features a clean UI, smooth scrolling. Ideal for showcasing creative services or portfolio projects. ([Try it here](#))

The box: This project features a clean, responsive design with clear navigation and well-organized sections. Attention to layout, spacing, and consistency highlights strong front-end skills and user-focused design. ([Try it here](#))

Digital Watch: A sleek digital watch built with HTML, CSS, and JavaScript. It displays real-time hours, minutes, and seconds in a modern UI. ([Try it here](#))

Todo List App: A minimalistic Todo List app showcasing task management functionality with smooth user experience and clean UI using pure JavaScript. ([Try it here](#))
